

Handicare 1100

Our signature straight stairlift

The ultra-slim Handicare 1100 sits close to the wall, maximising space for other stair users, while its foldable seat, footrest, and armrests offer even more convenience.

Handicare 1100 | Our signature straight stairlift

The Handicare 1100 stairlift features unique friction drive technology rather than a tooth rack and pinion wheel to operate. This means no grease, no gears and an ultra quiet lift.

The style seat

A polished design (in vanilla) that's built for comfort. Adjustable seat height comes as standard.

Vanilla

Easy hinge

Easy! Simply fold up the rail to clear the doorway. The lightweight folding hinge rail is effortlessly folded out of the way to clear the hallway, while the stairlift is in a parked position.

Zero intrusion

This unique solution is designed for homes with a door at the top of the stairs. It eliminates the rail overrun, allowing you to install a Handicare 1100 stairlift without making modifications to your home.

Slide track

Unique to Handicare, our slide track is ideal for hallways where access is required through doorways either at the top and/or bottom of the stairs. It automatically slides the track clear of any obstacles while the stairlift moves up or down the track.

Scan the QR-code to see the Slide Track in action

Features

Energy efficient

Low running costs and batteries that remain operational if there's a power cut. The 1100 charges whenever it's parked to keep the batteries fully powered

Safety

Interlocking seatbelt - the stairlift will not move until the seatbelt is fastened. Other optional features include an emergency stop button, safety sensors and One Touch Alert.

Easy to maintain

No tooth rack on the rail, so no grease, which makes it very easy to keep clean.

Optional extras

Easily upgrade with additional options to suit your needs today and tomorrow. Powered swivel seat, powered folding footrest and velcro seatbelts available.

Compact

Folds to leave more room on the stairs when not in use. One of the slimmest rails on the market.

Easy to use

Scan the QR-code to watch our video showing how to use the 1100.

One Touch Alert

With the simple press of a button, you can dial your emergency contacts directly from your stairlift through the new Savaria One Touch Alert. A discreet yet invaluable feature that utilises two-way communication, the system connects you with assistance swiftly and reliably, if required.
